

WORK SMARTER TOGETHER

Your Workplace Without Walls

Today's employee works everywhere — at home, on the road, and in the air. Every meeting includes remote participants, and the modern enterprise depends on this global workforce to be competitive. That's why Silicon Valley-based Prysm created its enterprise-grade digital workplace platform.

Prysm, a privately held company, is growing quickly and today has over 400 employees, a global sales and support network, and offices all over the world.

The Prysm platform was purpose-built for companies that rely on the collaboration of an international workforce for innovation, but are faced with the substantial challenges of effectively leveraging those global teams. It combines content, applications, and communications tools together into an interactive, cloud-based digital workplace accessible from conference-room displays, desktop and laptop computers, and mobile devices.

Benefits Include

- **Unparalleled enterprise agility:** Accelerate product and service development and get to market faster.
- **Enhanced internal productivity:** Better engage employees and give them the tools to collaborate with colleagues, no matter where they are located.
- **Frictionless sales:** Turn old-school presentations into next-generation collaborations. Capture sophisticated customers with tools to pitch, propose, and close.
- **Advanced decision support:** Derive better data insights. Harness the collective brainpower from different parts of your organization to make better decisions faster.
- **Mobile-anywhere access:** Support workers who work from home or on the road. Lead and participate in meetings and conduct presentations from laptops, smartphones, and tablets.
- **Upgraded physical spaces:** Bring the power of Prysm to your conference rooms and huddle rooms.

Who is leveraging our platform?

Prysm powers many companies in the Fortune 1,000. Our customers are leaders in all industries, including technology, energy, finance, healthcare, media, and higher education.
