Enter the 9th Dimension during our NitWit Nonagon on 9/9/16. Learn about the latest in Display Technology, and the best practices for creating Large-Scale Digital Installations. Receive CTS RU credits by attending the seminars, or simply come to network with the local Silicon Beach AV Community.

- See:** the latest in Display Technology, Custom Mounting Solutions, and Digital Content
- Learn:** the latest Products and best Practices for creating Large-Scale Digital Installations
- Network:** with the local AV and Digital Arts Community
- Enjoy:** Free food & drinks throughout the day

**Free Valet Parking Available | Room Block @ The Courtyard LAX/El Segundo | RSVP Required**

**NitWit comes from the words Nit & Wit. Nit is a measurement of light, and Wit is quick knowledge.**

These sessions are for bright and sharp AV Souls. This event is geared towards Consultants, Integrators, Creators, Architects, End-Users, Manufacturers, and will be a great way to network.

Doors open at 12:00noon. The timeline for this event includes:

**12:30PM & 3:30PM**

Randy Pagnan, President of RP Visual Solutions presents: *"The Art of Screens"* 2 CTS RU units

**1:30 & 4:30PM**

Jon 9, CEO of Holonyne Corporation, presents: *"9 Ways to Win: Integrating Content & Hardware for Large-Scale Installations"*

**2:30 & 5:30PM**

Benjamin Hardy & Grant Wylie of NEC Display Solutions present, *"How to Determine the Right Display Technology"* 1 CTS RU

**6:30PM - 10:00PM**

Can't make the NitWit? No worries....

Come to the After Work Videowall Art Reception sponsored by [9THouse.com](http://9THouse.com) – the Digital Art Atelier created by Jon 9 to provide project development, hardware configuration and programming services to digital artists for large-scale, public and corporate artworks. Jon 9 and the 9THouse crew will rev up the Hippotizer V4 realtime media server and throw down some live multi-screen mixing on their 18-screen 8K NEC ultra-narrow video wall. Also screening: Video wall Art by Jon 9: *"Running the Human Race in the 9<sup>TH</sup> Dimension"* – a new work comprised of 999 videos culled from the internet.

## Speaker Bios

### **Jon 9 , CEO of Holonyne Corporation**

An industry veteran of more than 25 years, Jon 9 has broad experience with large, complex digital display installations that require special production techniques to accommodate mega-resolutions and non-standard aspect ratios. He will discuss these challenges and the solutions provided by current and emerging technologies.

### **Randy Pagnan, President of rp Visual Solutions (RPV)**

Randy has been immersed in the visual display industry for over three decades, specializing in 24/7 displays for large-venue display applications. Network Operation Centers, Digital Signage environments, and immersive 3D applications are a few of his specialties—but his knowledge base is always evolving. Randy has also established himself as one of the premier educators in control room design and projection screen technology. He brings a myriad of knowledge to the Audio Visual Industry as a manufacturer, system integrator, and display expert. He offers a vast array of experience in the design and consulting of visual display technologies.

### **Benjamin Hardy, Product Manager—Large Format Displays for NEC Display Solutions of America**

Benjamin Hardy, Product Manager for NEC Display Solutions of America, Inc., is responsible for the company's large format display category. Ben focuses on the technologies and design of NEC's large-screen products. He is responsible for product launches with specification details and go-to-market strategy as well as technical documentation and marketing materials to support the sales department. Additionally, Benjamin works closely with the engineering department to assist in new product development and channel marketing department for press releases, sales tools and informational webinars.

### **Grant Wylie, Sr. Product Manager — LED for NEC Display Solutions of America**

Grant Wylie, Sr. Product Manager for NEC Display Solutions of America, Inc., is responsible for the company's Direct View LED display category. Grant focuses on the overall business plan for North America, plus the technologies and design of NEC's LED products. He is responsible for product roadmaps, product launches with specification details and go-to-market strategy as well as technical documentation and marketing materials to support the sales department. Additionally, Grant works closely with the engineering department to assist in new product development and channel marketing department for press releases, sales tools and informational webinars.
